***Allowable Subject Matter***

1. Claims 1-3, 5-9 allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: The allowability resides in the overall structure of the device as recited in independent apparatus claim 1 and at least in part, because claim 1 recites: "a semicircular section formed at one end of the swing housing; a compensating member protruded at a prescribed position of the bottom surface of the swing housing; and a recess formed at a prescribed area of the body housing for accommodating the semicircular section and the compensating member of the swing housing while being continuously opposite to the compensating member".

The aforementioned limitations in combination with all remaining limitations of claim 1 are believed to render said claim 1 and all claims dependent therefrom patentable over the art of record.

The closest reference to the present invention is believed to be Taninai (US Pub 2004/0248628).

3. Taninai teaches wherein a recess is formed at a prescribed area of the body housing, but did not disclose "a semicircular section formed at one end of the swing housing; a compensating member protruded at a prescribed position of the bottom surface of the swing housing; and a recess formed at a prescribed area of the body housing for accommodating the semicircular section and the compensating member of the swing housing while being continuously opposite to the compensating member".
